REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art does not provide for a light-emissive device comprising first and second electrode layers and one or more layers including a layer of light-emissive material arranged between the first and second electrode layers such that charge carriers can move between the first and second electrode layers and the light-emissive material, wherein at least the first electrode layer comprises a plurality of sub-electrodes, each sub-electrode being connected to each of any sub-electrodes directly surrounding it via a fusible link, each fusible link adapted to break and electrically isolate the respective sub-electrode from the other sub-electrodes when subject to an anomalously high current caused by a defect in a portion of the one or more layers situated between the second electrode and the respective sub-electrode.

Additionally, the prior art does not provide for a light-emissive device comprising a layer of light-emissive material arranged between first and second electrode layers such that charge carriers can move between the first and second electrode layers and the light-emissive material, wherein at least the first electrode layer comprises a plurality of sub-electrodes, each sub-electrode being connected to each of any sub-electrodes directly surrounding it via a fusible link, the fusible link being of smaller dimensions than the sub-electrodes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
